

NON-CLOGGING DOWNSPOUT INSERTS

Syphoon™

Designed to fit all gutter and leader systems

NO MORE CLOGGED OR FROZEN GUTTERS... because there is no standing (stagnant) water when you use the revolutionary Syphoon™ Non-Clogging Downspout Inserts. Designed to fit all gutters and downspouts, they install in seconds and work forever since there are no moving parts to wear out or break. Simply position the Syphoon™ over the downspout. It will block out the leaves and debris that clog the downspouts and cause one of the most annoying rain-related problems.

Engineered design allows up to 25 gallons of rainwater to be siphoned per minute—from underneath the leaves and debris—even when the gutter trough is clogged. The key to the Syphoon's success is in keeping the downspouts open so that water can exit the gutters instead of spilling over the edge. Rustproof polypropylene construction, 6½" long.

- **Installs in Seconds**
- **No Standing Water**
- **No Clogged Downspouts**
- **Siphons 25 Gallons per Minute**

PACKAGING AND PRODUCT MIX TO MEET RETAIL AND MAIL-ORDER NEEDS

FOUR-COLOR HEADER RETAIL PACKAGE

FOUR-COLOR RETAIL PACKAGE

Syphoon™ is packaged three to a box, or two to a polybag with header card.

Unique design prevents the downspout clogs that result in overflowing gutters.

Even when leaves & debris are built up around the Syphoon™ the flow-through design will siphon the water out of the gutters.
